Unilink software for PC is a tool for configuring Lexium 15 servo drive operating parameters.

Its simple, easy-to-follow graphic interface helps to reduce setup costs.

It incorporates various functions for the setup phases, such as:

- Parameter setting
- Advanced adjustment of the various control loops
- Programming motion tasks
- Supervision

This software is available in two versions, for configuring Lexium 15 LP servo drives (Unilink L) and Lexium 15 MP/15 HP servo drives (Unilink MH).

It is supplied with the servo drive as standard.

Schneider Electric has selected GBX gearboxes made by Neugart to be used in association with the BSH and BDH servo motor ranges.

As their association with BSH or BDH servo motors has been fully qualified and they are very easy to mount, the gearboxes are simple to put into operation and risk free. Available in 5 sizes (GBX 40... GBX 160), the planetary gearboxes are offered in 12 gear ratios (3:1...40:1).
